

### Air Ankle Stirrup

The air ankle stirrup is designed to help support and protect unstable or injured ankles. Single chamber design allows for bladder to be inflated to desired compression, which assists in providing maximum support. The anatomically contoured shell design is universal for right or left applications.

This product also features an adjustable heel pad and proximal/distal tibial straps providing for easy application and proper fit.

### Hinged Ankle Support

The hinged ankle support is designed to provide ankle stabilization while allowing plantar and dorsi flexion of the foot when used in conjunction with a shoe. While it fits into many style shoes, the ankle support will not normally fit with slip on dress shoes. It will fit comfortably in athletic shoes and many soft walking shoes with the insole removed. Note: You should never walk on your ankle support without a shoe.

### Townsend Premier Ankle Brace

Townsend's ultra lightweight, low profile custom Premier Ankle Brace features carbon graphite shells and joints. The rigid superstructure provides the ultimate foot/ankle support. Adjustable joint inserts allow the fitter to restrict inversion and/or eversion motion - without any limitation to normal plantarflexion and dorsiflexion motion. Additional options include an anterior shell design and dorsi assist bands.
