

TOWNSEND

Rebel Reliever

The dual badshifter allows you to shift the angle of the femoral shell up to 18 degrees to optimize unloading and patient comfort.

Townsend's Rebel Reliever provides unloading and pain relief for patients who have mild to moderate unicompartment OA. This lightweight, low profile brace features Townsend's patented hinge motion, suspension and rotation control technology -- and our exclusive Loadshifter Relief Mechanism for adjusting corrective force.

Potential Users

- Patients diagnosed with mild to moderate medial or lateral OA
- Patients who have OA combined with knee instability

Models

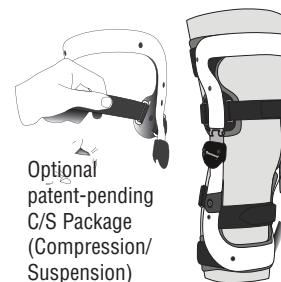

- Single or double band tibia shell
- Medial OA, Lateral OA or universal (for stock inventory)

Ordering Options

Color: Available in a variety of textured and high gloss powdercoat finishes.

Standard Sizes: XS-XXL determined by thigh circumference measurement for stocking inventory or individual patients with proportional leg sizing.

Customized: Townsend is the only orthopedic manufacturer that will "customize" a prefabricated brace at no additional charge. Provide leg circumferences 6" above and below knee center, and a M-L knee width. Braces ordered from three leg measurements are backed by our exclusive "Get It, Fit It" Guarantee. The brace will fit right out of the box, or we will pay for it to be returned for adjustment or replacement.

Optional patent-pending C/S Package (Compression/Suspension) includes semi-rigid padded inserts attached inside the thigh shell create dynamic compression and enhanced suspension when the patient tightens the distal thigh straps.
