**Casting Protocol**

*The cast should be taken with the arm in a natural hanging position at the side of the body, which places the elbow in about 25 degrees of flexion. The forearm should be parallel to the side of the leg. The cast should extend from just proximal to the wrist up to the arm pit — or at least 6 inches above and below the elbow joint. The cutting strip should run down the anterior of the arm through the cubital fold. The following landmarks should be outlined with an indelible pencil: Olecranon, medial and lateral Humeral Epicondyles, Cubital Fold and proximal and distal margins of the brace.*
